

# VIA GO

## Enterprise-Grade Wireless Presentation

VIA GO transforms any meeting space into a fully-functional wireless BYOD environment

Wireless Presentation & Collaboration Solutions

VIA GO wireless BYOD-connected environments are a must-have for any modern meeting space.

## Wireless BYOD Presentation

for iOS, Android, Chromebook, PC, Mac

- Clutter free: No adapters or cables
- Engineered for consumer devices used in business meeting environments
- Video port agnostic: Ideal for today's wireless BYOD devices
- Make any meeting room wireless with virtually no installation time
- Secure guest connections with dual network support

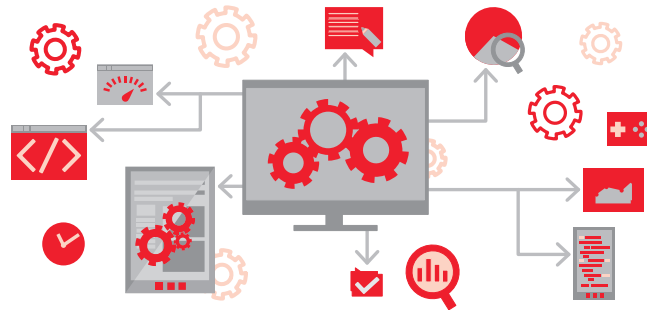

---

# Increase student engagement & transform corporate training with VIA GO

## VIA GO Features and Functionality

- Mirroring for iOS, Android, Chromebook, PC, & Mac
- Clientless connection with VIAcast Miracast & AirPlay
- Built-in Wi-Fi capability
- Smooth 1080p60 video playback
- Industry leading 1024-bit content encryption
- Present two sources on a single display
- Moderator mode to oversee meetings and select presenters
- Integrated YouTube player for seamless video playback

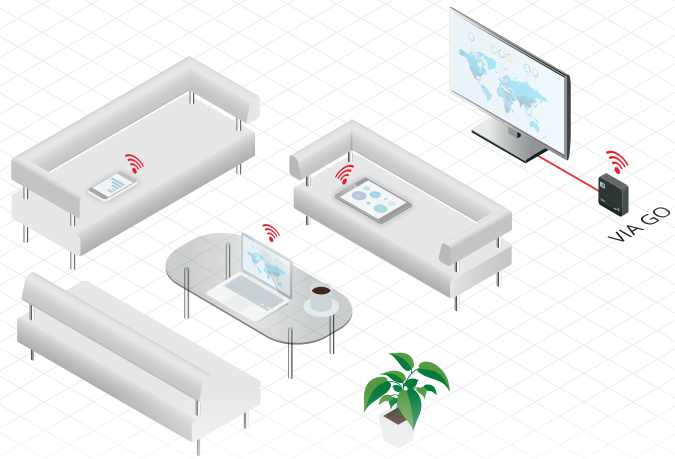

## VIA Site Management (VSM)

VSM makes it simple to control, configure and update multiple VIA GO devices from a single user-friendly IT management interface. With VIA Site Management, you can configure, manage and monitor devices, view usage and analytic data, and perform VIA firmware updates.

VIA Site Management is also available as an on-cloud solution. Get all the features found in the on-site version plus the flexibility of managing and monitoring your VIA devices remotely and securely.

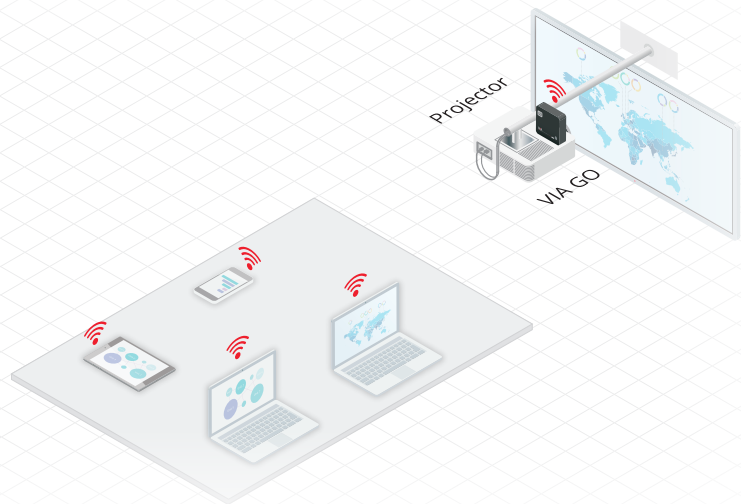

---

## Huddle Space

---

## Meeting Room

---

## Classroom

## Powerful Wireless Connectivity for Classrooms, Huddle Spaces, Boardrooms and Mobile AV Carts

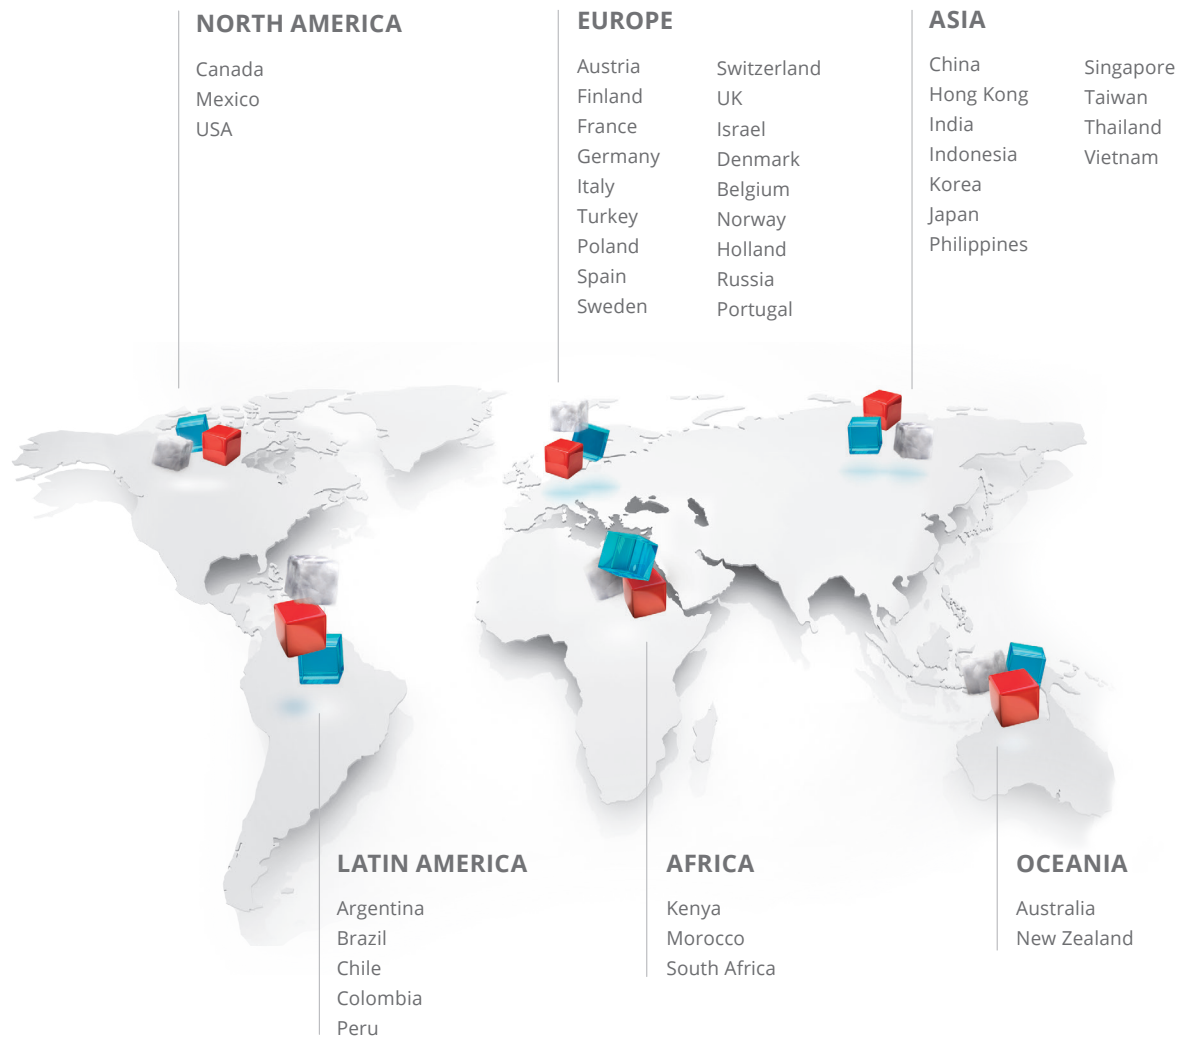

Transform existing projectors and displays into state-of-the-art wireless BYOD solutions. VIA GO has its own Wi-Fi network and can also be connected to wired LAN. This advantage allows for easy installation and Wi-Fi capabilities in spaces with no Wi-Fi.

VIA GO lets users present with two different devices from separate networks, e.g., guest network and internal network. With an intuitive interface, VIA GO offers a BYOD presentation solution that's both dynamic and easy to use.

## Digital Signage

Get the most out of every monitor by displaying custom content during meeting downtime with VIA GO's optional Digital Signage feature.

# About Kramer

In 1981, Kramer was founded with passion and resolve to innovate in the video era. Since then, we have consistently grown and evolved with an industry that has raced forward at lightning speed. Today, along with our partners and distributors, we passionately serve Pro AV customers on six continents with innovative solutions powered by cutting-edge cloud technologies, advanced software applications and industry-leading hardware.
