A productive, stress-free experience throughout the workday

Unified Communications has been around for more than 25 years, but you'd never know it based on the user experience. As you go about your day, it can feel like a series of puzzles you have to solve to get the technology in different meeting spaces to work. Precious time is wasted. Meetings run late and often bump up against the next scheduled meeting. Frustration builds up. Productivity goes down.

By providing a simple, consistent user experience in all the places you work, Crestron Flex solutions clear the way to a productive, stress-free day.

8:00 AM The day begins

In your office, Crestron Flex P-Series voice devices provide you with your day's calendar and connect you with coworkers and customers alike.

9:15 AM Emergency meeting

Your colleagues need to review a spreadsheet before the team meeting. No problem. Crestron scheduling touch screens connect to your calendaring system. It indicates a nearby huddle room is available. You book it on the spot.

10:00 AM Team meeting

Your colleague seamlessly transitions her call to the Crestron Flex M-Series tabletop conferencing system and you all discuss in real-time.

12:00 PM Global meeting

As you head to your next meeting, the illuminated Crestron room availability hallway signs help you easily locate the room. As you enter, your team's name is on the display and the same interface greets you on a 10" touch screen.

The Crestron Flex B-Series smart soundbar provides crystal clear voice pickup around the room. One touch and everyone is connected to the room, along with the UK leadership team. On-time. Efficient.

3:30 PM Training session

Joining the session is simple. The Crestron Flex C-Series Integration Kit provides an intuitive interface, even in the most complicated spaces, giving meeting facilitators the confidence they need to have a great session.

Collaboration that works. In every way. One solution. One experience. One touch. One partnership.

The Crestron Flex platform natively supports Microsoft Teams™ and Skype® for Business software on every device, everywhere people work. Crestron Flex devices come in several forms, but all deliver the same consistent Microsoft user experience, from desktop to boardroom. Activate calls, presentations, and videoconferences with one-touch simplicity from a complete range of state-of-the-art products from one provider, backed by decades of audio and video expertise.

Easily deploy, manage, monitor, and evolve up to thousands of Crestron Flex devices locally and globally from a single dashboard using the award-winning Crestron XiO Cloud™ IoT-based service, built on the Microsoft® Azure® platform.

Crestron Flex also uniquely provides capabilities beyond the typical UC solutions. Integrate room scheduling to check room availability or book a meeting with a single touch. Even integrate with advanced video controls and smart building ecosystems so you can lower shades and adjust lighting or temperature.

Microsoft Teams software is the hub for teamwork in Office 365® software. It integrates all the people, content, and tools work teams need to be more engaged and effective. Whether your organization is using an on-premises implementation of Microsoft Teams, running a hybrid deployment of Skype for Business and Microsoft Teams, or fully committed to IC and Microsoft Teams within Office 365, Crestron's open solutions are ready to support you.

The Skype for Business unified communications platform enables messaging, conferencing, online meetings, and collaboration as part of Office 365. With Crestron you can natively run Skype for Business in meeting rooms of every shape and size: conference spaces, boardrooms, multipurpose spaces, and auditoriums.

Crestron Flex P-Series

Desktop Phone

Initiate a conference call on your cell. With one touch move the call to your desktop to free your computer. Search contacts. Check status of your projects. Find your next meeting. It's not a phone; it's a hub for collaboration between peers, and between devices. And Crestron makes it work seamlessly.

KEY FEATURES

Natively runs Microsoft Teams and Skype for Business with one-touch join

Manage contacts | Join or book a meeting | See your day

Connects to network with latest security standards

Exceptional HD sound quality for crystal-clear speech

Full-featured keypad and high-resolution 7" color touch screen

Place or receive calls using handset or speaker

Zero-touch provisioning and centralized management from Crestron XiO Cloud

OPTIONAL USB HEADSET COMPATIBILITY ([CRESTRON FLEX UC-P110](#))

70%
of workplace collaboration happens at the desk.

Room scheduling

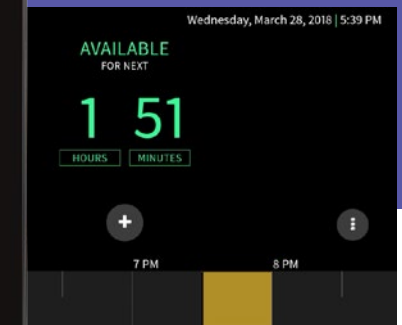

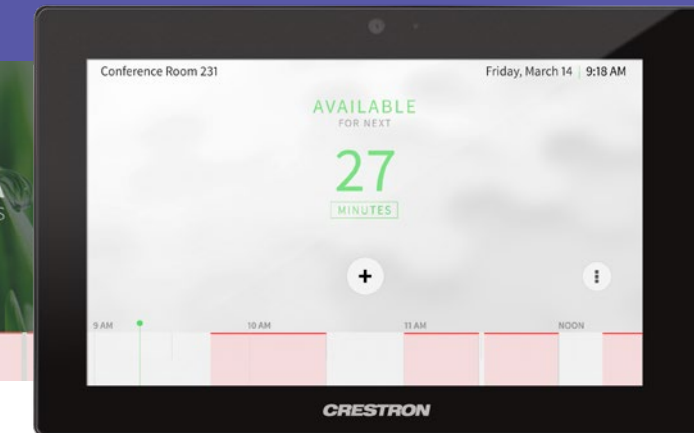

The modern workplace is fast-paced, flexible, and dispersed. You need a scheduling platform that not only keeps up with you, but makes everyone more efficient, connected, and collaborative across all spaces while meeting your booking requirements.

Crestron makes it simple and convenient to locate and book available meeting spaces from wherever you are; on your mobile, outside the room, or inside the room. The system directly connects to Microsoft Exchange and Office 365, so people can book rooms on the spot. And the system is intelligent enough to return rooms to inventory when employees no-show, thereby optimizing usage.

Crestron XiO CLOUD™

IoT-Based platform

Winner of the 2018 Microsoft Global Partner of the Year Award for IoT, Crestron XiO Cloud is a revolutionary IoT-based service that enables you to securely deploy, proactively manage, monitor, and evolve workplace technology anywhere in the world through a standard web browser, and reduce associated complexities.

Hosted on the Microsoft Azure® IoT platform, and natively built into Crestron products, Crestron XiO Cloud delivers up to 90% reductions in installation time and dramatic improvements in device uptime. Most routine maintenance tasks, such as logo updates, can be performed from anywhere, automatically. Data gathered by Crestron XiO Cloud enables you to match new technology investments to actual usage and optimize your budgets.
