DESCRIPTION

Desono™ P6 is a two-way passive coaxial loudspeaker intended for full range music reproduction in distributed audio applications. It delivers high intelligibility coupled with a wide coverage area, allowing system designers to use fewer speakers while maintaining acceptable levels of speech intelligibility.

The P6 utilizes a 6-position switchable transformer ranging from 1.875W to 60W with low-impedance bypass for constant-voltage operation, making it an excellent choice for large areas of BGM.

Designed with the installer in mind, the P6 also comes pre-terminated with Magic Cable, a composite cable comprised of two aircraft cables, two audio conductors jacketed separately, and two ripcords for slicing through the cable jackets.

Desono P6 is designed for outdoor splash applications such as patios or concourses, and an ideal choice for both indoor and outdoor distributed audio applications that demand superior speech intelligibility and full range music reproduction.

Biamp strives to improve its products on a continual basis. Specifications are therefore subject to change without notice.

Data presented on this spec sheet represents the basic performance specifications for the model. For a detailed analysis of this loudspeaker's performance, please download the GLL file and/or the CLF file from our website: biamp.com

FEATURES

- Stylish “raindrop” profile
- Bridge-mounted soft dome tweeter mechanically isolated from the low frequency driver
- Magic Cable is pre-terminated inside the pendant to ensure no exposed connections at the loudspeaker; contains two hardened stainless steel cables and two audio conductors
- IP54 rated for outdoor splash applications such as patios or concourses
- 6-position 70V/100V tap (60W, 30W, 15W, 7.5W, 3.75W, 1.875W) with low impedance bypass
- ETL listed to comply with UL1480A; certified to CSA C22.2#62368-1 and C22.2#60950-22
- Covered by Biamp Systems’ five-year warranty
